PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building high-performance web applications using React.js, Next.js, Node.js, Tailwind CSS, and MySQL. Currently leading full-stack development on Pulse Orbis, a hospital SaaS platform, as Senior Full Stack Developer. Previously delivered enterprise-grade solar platforms (ZEP360) serving 10+ clients. Proven expertise in REST API design, scalable component architecture, agile delivery, and performance optimisation.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Redux, Bootstrap, Material UI, jQuery
Backend: Node.js, Express.js, RESTful APIs, PHP
Database: MySQL, SQL
Tools: Git, Docker, Webpack, NPM, CI/CD, Jenkins, JIRA, Axios

WORK EXPERIENCE

Pulse Orbis – Hospital SaaS Platform

Jan 2026 – Present

Senior Frontend Developer & Full Stack Node.js Developer

- Leading frontend and full-stack Node.js development of a hospital SaaS application covering patient management, appointment scheduling, billing, and clinical workflows.
- Architecting and maintaining Node.js/Express REST APIs and MySQL schemas for complex healthcare data with Role-Based Access Control (RBAC).
- Building React.js dashboards for admin, doctor, nurse, and patient portal views with optimised performance and scalable component design.
- Resolved major backend and frontend issues; improved system stability and reduced critical bug count significantly post-onboarding.

ZEP360 – Build for Construction

Aug 2025 – Dec 2025

Senior Frontend Developer

- Developed frontend modules for ZEP360's construction management platform using React.js and Next.js with Tailwind CSS.
- Resolved major UI/UX issues; improved component architecture and page performance for construction workflow screens.
- Collaborated closely with backend team to integrate Node.js/Express APIs and ensure seamless data flow across modules.

ZEP360 Solar – Admin Portal & Installer Portal

Mar 2023 – Jul 2025

Senior Frontend Developer & Full Stack Node.js Developer

- Led React.js + Next.js frontend for ZEP360 Installer App serving 10 active enterprise clients in the solar industry.
- Built and maintained live ZEP360 Admin Portal with role-based access control for client, project, and installer management.
- Developed Node.js/Express REST APIs for authentication, project management, and reporting; integrated with Redux + Axios.
- Architected reusable Tailwind CSS component libraries adopted across both installer and admin surfaces.

Flock Co-Living P.G Solutions

Jan 2022 – Feb 2023

React Developer

- Architected React.js + Next.js frontend with Tailwind CSS, reducing page load time by 40% via SSR/SSG and code splitting.
- Built reusable component libraries; conducted code reviews and enforced best practices reducing production bugs by 30%.

Inn4smart Meter Solutions, Gurugram

Aug 2021 – Dec 2021

React Developer

- Developed user-facing features using React.js, JavaScript, PHP, and SQL; maintained vendor integrations in an agile environment.

KEY ACHIEVEMENTS

- Reduced page load times by 40% through lazy loading, code splitting, and Next.js SSR/SSG optimisations.
- Designed reusable component libraries adopted across 3+ projects, cutting development time by 25%.
- Delivered 2 live products – ZEP360 Installer App & Admin Portal – currently serving 10 enterprise clients.
- Reduced production bug count by 30% by championing code review culture and automated testing practices.
- Resolved major backend issues on Pulse Orbis post-onboarding, significantly improving platform stability.

EDUCATION

Manav Rachna International University – Bachelor of Business Administration (Global International Business) 2009 – 2012
